

# US - B2B Store Edition

Created by: US Regional Product Team

## Introduction

An edition is a "Pack" of Apps that compose the initial experience on a VTEX Store, it contains all the apps for basic functionality. The B2B Store Edition also includes a few B2B related Apps.

We also keep a default theme with an initial setup that can be used as a reference for your own development

## Installation

You'll need the VTEX CLI toolbelt to connect to your environment, you can find more information about the CLI [here](#)

You may need assistance from a VTEX employee to setup this edition to your account

```
vtex edition set vtex.b2b-store-edition@0.x
```

It's not mandatory to set a new edition, you can install the Apps manually to the account

## Apps

### Checkout UI Custom

Allow the Store Admin to customize the checkout experience.

<https://vtex.io/docs/components/functional/vtex.checkout-ui-custom>

### Quick Order

Also known as Bulk Order, provides different ways to add products to the cart in a more productive way, it lives under `/quickorder`

<https://vtex.io/docs/components/functional/vtex.quickorder>

### B2B Organizations

App to create and manage B2B Organizations and Cost Centers, it provides a Register route (`/organization-request`) and management interfaces from the Store Admin (`/admin/b2b-organizations/organizations`) and Store Front (`/account#/organization`)

<https://github.com/vtex-apps/b2b-organizations/>

### B2B Orders History

It's a fork from the default Orders App that relies on the B2B Organization to allow users to see order from their Cost Centers or Organizations depending on the Role

This app can be found under `/account` menu, the default Orders History is hidden by a configuration on the My Account app

<https://{{accountName}}.myvtex.com/admin/apps/vtex.my-account@1.x/setup/>

## B2B Quotes on

With this App you can save a cart, name it, add comments and submit it to approval, it also supports different permissions depending on the User's role

List Quotes route is available under `/b2b-quotes` and `/b2b-quotes/create`

<https://github.com/vtex-apps/b2b-quotes>

## B2B Checkout Settings

This app changes the behavior of the checkout flow, it replaces the original Shipping Step with a list of shared addresses within the same Cost Center, also uses the Storefront Permission to block the checkout flow from users with restricted permissions

<https://github.com/vtex-apps/b2b-checkout-settings>

## Storefront Permissions UI

This app allows you to customize Role permissions of Apps that depend on `vtex.storefront-permission`. It also exposes a block interface to allow you to change the Theme's behavior depending on the User's role

<https://github.com/vtex-apps/storefront-permissions-ui>

## Customers Admin

This app allows you to make changes to the user configuration, making changes to their Organization and Cost Center

<https://github.com/vtex/admin-customers>

## B2B Theme

We've released a 2.x version of the B2B New Store Theme with an example for your initial development

<https://github.com/vtex-apps/b2b-newstore-theme/tree/v2.0.0>
